

Coresystems – now part of SAP – is a field service software company helping mid- and large enterprises manage field services. Our solution brings together the right data at the right moment to delight customers and drive business results - all delivered in the cloud to any mobile device with artificial intelligence in real-time. We're transforming field service with cutting edge technology to help companies create perfect service moments and delight customers.

Our young and innovative company is looking for a

Senior Backend Developer (Mobile API)

THE ROLE

We are looking for a talented and motivated engineer to join our team in the Berlin office who can hit the ground running and take our product to the next level, as we scale up and develop our business in our target markets. The engineers who are building our Core Platform work across the stack, always willing to go the extra mile to deliver the highest quality in enterprise software. As a Backend Developer for Coresystems you are building the Microservices of today that will redefine tomorrow's Field Service.

We are looking forward to your personal "core moments"!

CURIOUS ABOUT THE DAY-TO-DAY?

- Collaborating with team members developing the API for our mobile apps that are used by technicians in the field
- Working closely with the Product Manager and UX teams to gain a deep understanding of the problem space and how the end user interacts with the application
- Performing a technical analysis of requirements, estimating and delivering new features
- Monitoring the performance of the application and focusing on continuously improving it
- Developing robust, scalable applications and stay updated with the latest development trends

CURIOUS IF YOU'RE FIT?

- 6+ years' experience in a similar role working with Java and/or Scala
- Strong experience with Spring Framework (MVC, data, security, batch, boot)
- Operating experience with Microservices and RESTFUL web services
- Experience developing/designing high performant middleware components
- Good knowledge of SQL, PostgreSQL is an advantage and comfortable with Linux
- Strong understanding of TDD and DDD is a plus
- Know-how in cloud and container tools like docker, kubernetes
- Fluency in English (German is a plus)
- You are familiar with building and managing automated build/test/deployment environments
- You are a solution-oriented think who loves discussing ideas and collaborating with team members to deliver intuitive solutions

- You take ownership of your work and see things through (You build it, you run it)
- You love exploring various technologies and pick the best tools for the job at hand (languages, libraries, platforms etc.)

JOIN US, BECAUSE

- We are an enthusiastic, cool company and we like to have fun – during working hours and outside them
- We really engage ourselves in developing our products and take pride in delivering results
- Stretching yourself to achieve challenging goals is satisfying to us
- In our open culture, we welcome other opinions and enjoy discussing solutions
- The flexible and dynamic working environment gives us a lot of freedom and enables us to perform at a high level
- Our skills and know-how are up-to-date thanks to the yearly training courses we attend. We also offer the opportunity to travel to our other locations for know-how sharing
- We support mobile communication and mobility costs – unpaid leave is an extra cool benefit

Have we piqued your interest?

We look forward to receiving your application via email: recruiting-fsm@coresystems.net
