

*Coresystems – now part of SAP – is a field service software company helping mid- and large enterprises manage field services. Our solution brings together the right data at the right moment to delight customers and drive business results - all delivered in the cloud to any mobile device with artificial intelligence in real-time. We're transforming field service with cutting edge technology to help companies create perfect service moments and delight customers.*

Our young and innovative company is looking for a

## **QA Engineer**

### **THE ROLE**

We are looking for talented and motivated QA Engineer to join our team in Berlin who can hit the ground running and take our product to the next level, as we scale up and develop our business in our target markets. As a QA Engineer, you will drive a product used by thousands of field service technicians around the world and leading a distributed engineering team who is building the tools today that will redefine tomorrow's Field Service.

We are looking forward to your personal “core moments”!

### **CURIOUS ABOUT THE DAY-TO-DAY?**

- Write and execute automated tests and identify actionable bugs quickly
- Manage QA coverage of multiple web and mobile based projects
- Planning/organizing necessary test passes, staying on top of all important issues, help triaging bugs and driving issues to resolutions and keeping everyone aware of QA status
- Work with your team to collect necessary information to assure the QA coverage, and also provide feedback on quality issues
- Work across the teams to understand how your product is interacting with 3rd party systems and provide the right test coverage
- Help to make sure that every deployment goes out on time with high quality level
- Create and support test dashboards/report

### **CURIOUS IF YOU'RE FIT?**

- BS or MS degree in Computer Science/Engineering with at least 2 years Quality Assurance experience in testing mobile applications
- Experience writing Automated tests for mobile application, considering end to end user flows
- Knowledge of test and tool development methodology
- Good know-how in Selenium, Appium, XCTest, TestNG or Allure
- Experience with a CI system such as Bamboo or Xcode server
- Understanding of Docker, Kubernetes, Selenium Grid is an advantage
- Know-how of at least one coding language (Java, Kotlin, Objective C or Swift)

- You are experienced with all DevOps practices and coach your team & help to always optimize their outcome
- Motivated team player with strong communication skills (English – German is beneficial)

#### **JOIN US, BECAUSE**

- We are an enthusiastic, cool company and we like to have fun – during working hours and outside them
- We really engage ourselves in developing our products and take pride in delivering results
- Stretching yourself to achieve challenging goals is satisfying to us
- In our open culture, we welcome other opinions and enjoy discussing solutions
- The flexible and dynamic working environment gives us a lot of freedom and enables us to perform at a high level
- Our skills and know-how are up-to-date thanks to the yearly training courses we attend. We also offer the opportunity to travel to our other locations for know-how sharing
- We support mobile communication and mobility costs – unpaid leave is an extra cool benefit

#### **Have we piqued your interest?**
