

Coresystems – now part of SAP – is a field service software company helping mid- and large enterprises manage field services. Our solution brings together the right data at the right moment to delight customers and drive business results - all delivered in the cloud to any mobile device with artificial intelligence in real-time. We're transforming field service with cutting edge technology to help companies create perfect service moments and delight customers.

Our young and innovative company is looking for a

Senior Full Stack Web Developer

THE ROLE

We are looking for a passionate Web Developer to join our team in our Berlin office! Our Team is focused on developing a Cloud-based product that revolutionizes the Field Service world by using a mixed real-time Crowd Service approach. The ideal candidate should bring a positive, independent, can-do attitude coupled with a proven track record as well as a drive to develop innovative solutions based on cutting edge web technologies.

We are looking forward to your personal "core moments"!

CURIOUS ABOUT THE DAY-TO-DAY?

- Work in a cross functional product team with daily sync sessions and end to end product responsibility
- Design and develop full stack product features based on customer and business requirements
- Responsibility of one or more software components and their full lifecycle from development over test automation up to production deployment and monitoring
- Participate in cross team/component code reviews, software architecture & design sessions
- Maintain, improve and refactor product and test code base
- Evaluate, prototype and implement technical solution for modern real word business problems

CURIOUS IF YOU'RE FIT?

- Minimum 5 years of relevant work experience
- Excellent knowledge of modern, full stack JavaScript (TypeScript preferred) for Browser & Server
- Strong knowledge on Web standard HTML5, CSS3, Browser APIs and Web security
- Solid know-how of JavaScript frameworks (Express, AngularJS & Angular, React/Flux etc.)
- Experienced with software testing and practices like TDD, Unit-, End2End-testing and Frameworks
- Structured and strong in producing semantic HTML markup and clean CSS (SCSS)
- Basics in SQL, relational and non-relational databases as well as HTTP APIs & REST
- Basic knowledge in at least one other high-level programming language like Java, C#, GoLang etc.
- Fanatical about great UI/UX -design, usability and performance
- Experienced with DevOps practices and tools for continuous integration, test automation, continuous delivery and monitoring

- Flexible team player with high motivation and good communication skills in English (written and spoken) working in a distributed team, German is a plus

JOIN US, BECAUSE

- We are an enthusiastic, cool company and we like to have fun – during working hours and outside them
- We really engage ourselves in developing our products and take pride in delivering results
- Stretching yourself to achieve challenging goals is satisfying to us
- In our open culture, we welcome other opinions and enjoy discussing solutions
- The flexible and dynamic working environment gives us a lot of freedom and enables us to perform at a high level
- Our skills and know-how are up-to-date thanks to the yearly training courses we attend. We also offer the opportunity to travel to our other locations for know-how sharing
- We support mobile communication and mobility costs – unpaid leave is an extra cool benefit
